Files

On February 23, 1988, at 5:30 p.m., I met with several city officials and Cherokee County task force members to discuss EPA's proposed plan for the ground water and surface water remediation of the Galena subsite. The purpose was to explain the planned action with these officials and answer any questions that they had. It also was to listen to their concerns and the concerns of the community about the actions EPA is proposing. Present at the meeting were the following:

Tom Allen, Mayor of Galena
John O. Stevenson, Councilman, Task Force Member
Albert Anderson, Councilman
, Councilman
Myra Carlisle Fraiser, Task Force Member
Steve Langford, Task Force Member
Jack Boyes, County Commissioner
Jeannie Holstrom, County Clerk

I went through a summary of the action EPA is proposing and answered questions that they had on the action. They informed me that a lot of the residents thought that the public meeting was on the alternate water supply and the formation of rural water district. At the end of the meeting, Tom Allen expressed his support of the EPA action and was glad to see that something was going to be done in Galena.
